My favourite Lizy core values

Personal Growth

The need to reinvent oneself.

Drive

The need to commit to a goal.

Personal Growth: The Technical Evolution

Phase 1: Cloud Foundations

Python | AWS Lambda | CloudFormation

Learning a new language and ecosystem.

Building scalable serverless applications.

Learning to deploy and manage cloud infrastructure.

Phase 2: Advanced Architecture & AI

DDD/Hexagonal Architecture + LLMs.

Building complex systems with clean architecture to keep delivering value.

Creating intelligent, agentic applications (in-progress).

Drive: The need to commit to a goal

"Fines were not working because of a recent switch to a new infrastructure for our AI applications. Needed to push into the wee hours so the business is not impacted."

What Drive Means

Taking ownership of problems until they're solved.

Doing what's necessary, even if sometimes difficult.

Not settling for the lowest common denominator.

But perfection should stay a moving target! There's no absolutes.
